Features

Integrated weighing system

The F4 with scale combines pallet transport and weighing in one device, equipped with 4 load cells and a digital display. This allows operators to weigh goods directly while moving them, improving accuracy, reducing the need for extra equipment, and streamlining warehouse workflows.

Mobile efficiency

By eliminating the need for fixed weighing stations, the F4 with scale saves valuable time and floor space. Operators can check incoming goods or confirm shipping weights on the spot, which increases flexibility in busy logistics environments and boosts overall productivity.

Battery flexibility

The truck operates with long-lasting Li-ion batteries, while the weighing display is powered by standard AA batteries. This setup ensures reliable performance, easy replacement, and extended autonomy, keeping the truck ready for continuous operations throughout the workday.

Optional printer

For even greater convenience, the F4 with scale can be equipped with a built-in printer. This feature allows operators to print gross, tare, and net weights in either kilograms or pounds, providing clear documentation that supports stock management and shipping processes.
